Academic History

R.M.D Engineering College **2022 –2026**
B.Tech - Artificial Intelligence and Machine Learning
CGPA: 8.4
E.R.K Higher Secondary School – HSE **2021 – 2022**
Percentage: 88.67
E.R.K Higher Secondary School – SSLC **2019 – 2020**
Percentage: 97.60

Skills

Languages: Java, Python
Frontend: HTML, CSS,JavaScript
Backend:Spring Boot, REST API
Database: MySQL,MongoDB
Version Control: Git, GitHub
Cloud: Microsoft Azure
Tools: Postman

Projects

Pharmaceutical Sales Forecasting Platform Github Link

- Developed and deployed a full-stack pharmaceutical sales forecasting application, trained on last 5 year of historical data with current data continuously incorporated for next-batch retraining. Automated predictive analytics using ARIMA, SARIMA, and Prophet models to replace manual forecasting, enabling better inventory management decisions. Deployed on Microsoft Azure with real-time interactive dashboards
- **Tools**: Streamlit, FastAPI, SQLite,Azure

Enterprise Knowledge Assistant Github Link

- Developed an enterprise chatbot leveraging **Ollama's LLaMA3 (8B)** model with **Retrieval-Augmented Generation (RAG)** architecture, enabling employees to instantly query company culture, policies, and terms & conditions through a custom knowledge base of 28+ enterprise documents eliminating the need to manually read through records. Deployed as a **fully offline** end-to-end system to ensure complete data privacy and security of sensitive company information, removing cloud dependencies entirely .
- **Tools**: Python, LangChain, Ollama, FAISS, HuggingFace

Certifications

- **Microsoft** Microsoft Certified: Azure Fundamentals
- **Oracle** Oracle Certified Professional: Java SE 17 Developer
- **Wipro TalentNex**t : Java Full Stack
- **NPTEL** Python for Data Science (Elite+ Silver)
- **NPTEL** Computer Vision And Image Processing - Fundamentals And Applications
- **NPTEL** The Joy of Computing Using Python

Internships

Infosys Springboard – Java Full Stack Development Intern – Remote **Dec-Jan 2026**

- During this internship, our team was assigned the project VolunteerHub, a web-based platform designed to streamline volunteer coordination and enhance community engagement for NGOs and social organizations.
- My primary responsibility in the project was implementing RESTful APIs for the organizer module and also developed automated email notifications and scheduled reminders using JavaMailSender and Spring Scheduler to improve communication with volunteers.
- In addition, I implemented check-in tracking and feedback mechanisms to help monitor participation and enhance transparency in event management.

Cognizant– Machine Learning Intern – Onsite **April - July 2026**

- Completed a 3-month internship focused on Data Science, Python, SQL, Data Warehousing, ETL, PySpark, Big Data, and Machine Learning. Gained hands-on experience through industry-relevant projects while strengthening problem-solving, data analysis, teamwork, communication, and presentation skills.

Achievements

- Won **Second Prize** in College Internal Hackathon
- Won **Second Prize** in Intra-Department Machine Learning Competition
- Won **Second Prize** in Poster Presentation in Business Plan Showdown Contest
